- 28" to 44" Telescoping spreaders
- 34" to 54" Telescoping spreaders
- 52" to 88" Telescoping Spreaders
- 96" to 144" Telescoping Spreaders

- **MOD Series Aluminum Trench Boxes**

Mod Series Boxes consist of 2' high panels with end post components in which you can build the box to your desired size. It can easily be taken apart and transported in the back of a pick up truck. Its other benefits include closing off the box and making it 3-sided or 4 sided. It also works great if you have a pipe or utility coming into the trench perpendicular. The bottom panel can be removed so you do not crush the utility.

Advantages include building the box to a wide arrange of heights and lengths. 4' high, 6' high, 8' high, 10' high or these boxes may also be stacked on top of each other when using the proper stacking pins/brackets.

- Spreader Widths Include:

- 28" to 44" Telescoping spreaders
- 34" to 54" Telescoping spreaders
- 52" to 88" Telescoping Spreaders
- 96" to 144" Telescoping Spreaders

- **HATS (Hydraulic Aluminum Trench Shields)**

Using a 5 gallon hydraulic bucket pump (sold separately), user may pump out the trench box so it extends out to trench wall. (must have correct width of spreader struts installed for certain trench width)

- Spreader Strut widths include:
 - 26" to 40"
 - 32" to 50"
 - 38" to 59"
 - 44" to 68"
 - 56" to 92"
