# GROUT SEMINAR

**WHERE: SAYLOR TOWNSHIP FIRE HALL  
211 NW 54TH AVE.  
DES MOINES, IA 50313**

**THURS. MAR. 28TH, 2019  
8 AM TO 11:30 AM**

**AGGENDA:** We will start with educational information in classroom setting and we will then go outside for "HANDS ON" demonstration/experience with an actual RCP Structure. We will then conclude the class with a question and answer session recapping the hands on experience and visiting about what products worked best!

**WHO SHOULD ATTEND:** Sewer/Water Foreman or applicators, Company owners & Superintendents, Rehab. companies, Engineers, Municipalities, RCP manufacturers, or anyone else that wants to learn about solving infiltration problems in manholes or other concrete structures.

Avanti International, a leader in the injection grouting industry for over 40 years, will be presenting on the various applications where polyurethane grouting technology can benefit below grade infrastructure. We will also have live demonstrations using these products and provide an overview of equipment and proper maintenance required with the use of polyurethane products. If you're a contractor, municipality, or an engineer working on below grade infrastructure you're likely no stranger to the challenges created by ground water. Not only does infiltrating water increase treatment costs dramatically it is also a precursor to larger issues. Structural defects within basements, electrical vaults, manholes, lift stations, wet wells, culverts, and piping of all types can nearly all be traced back to water.

**# ATTENDING \_\_\_\_\_**

**PRESENTOR: JAKE SWANSON— AVANTI MIDWEST REGIONAL MANAGER**

**COST IS FREE, BUT CLASS SIZE "IS" LIMITED —- RESERVE YOUR SPOT NOW!  
MUST RSVP—BBQ LUNCH INCLUDED—IF WE FILL UP MORNING CLASS WE
